

The most comprehensive ZIP code database in the world

Complete, accurate, and always up-to-date

Zip code and Address data

Global database containing all ZIP codes, administrative divisions, and cities for **247 countries**, even in **hard to source geographies** like China, Japan, or Brazil.

Global languages

Geocoded data

Address data

House numbers

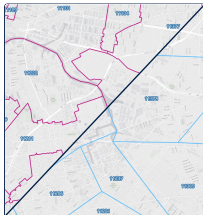

Administrative levels

Time zones and DST

Boundary database

Global boundaries are delivered at **ZIP code** and up to **5 administrative levels**. Guaranteed shape accuracy, ensuring **no gaps, overlaps, or duplicates**, providing simplified and high-precision boundaries.

Population data

Population distribution and density at administrative and ZIP code levels over 55 years: **past, present, and future**. Standardized, aggregated, and ready to use.

Get the right data for your use case

Address Capture and Validation

Capture accurate addresses for every country and territory in the world, in any language, and match local requirements.

Reporting and Business Intelligence

Ensure accurate and consistent reports across your organization. Enhance data analysis with location intelligence.

Map Visualization

Analyze complex trends and discover actionable insights. Build engaging and intuitive map-based data visualizations.

Master Data Management

Rely on a single source of truth and increase the quality of your location data. Ensure accuracy, consistency and timeliness across your systems and organization.

Logistics and Shipping

Design and optimize your distribution network, plan your pick-up and drop-off locations, reduce costs and improve visibility over your shipping.

Market Research and Geomarketing

Why work with us

Global coverage

Complete coverage across 247 countries, including hard-to-source geographies like China, Japan, Brazil, and Russia.

Highest quality

Built on extensive, authoritative sourcing with robust data engineering and quality control. Standardized & always up-to-date.

Expert Consulting

With 15 years of experience, we guide the implementation, deliver the format of choice, and solve any technical challenge.

We know that data can change over time. It's good to know that our partner is keeping an eye on these changes and will always provide us with very updated information to work with.
